Post-test Reflection: Planning for the Future

What study techniques did you use to prepare for the exam?

___ Reviewing lecture notes
___ Reading assigned material
___ Creating individualized study aides (outlines, flash cards, study guides, etc.)
___ Predicting test questions and test content
___ Studying with classmates
___ Practicing patient care scenarios
___ Other ___________________________

Which of these techniques were most useful? ________________________________

What additional test preparation techniques might you practice in the future? _________________

My major test taking weaknesses were:

___ Pacing (time management while testing)
___ Comprehending test question wording
___ Recalling information
___ Guessing answers
___ Studying the wrong material
___ Other ___________________________

How prepared did you feel for the exam? ________________________________

Will you change how you study for exams in this class in the future? How so?

________________________________________________________________________

________________________________________________________________________

The most difficult aspect of the test was: ________________________________

Why? ________________________________
